D E S I G N C O N C E P T S P E C I A L I S T

*I have over 9 years experience in Design Communication. My qualifications are as follows, thorough knowledge of InDesign, Photoshop, Illustrator and QuarkXpress 6.5. I also possess related experience in Acrobat 6.0, Microsoft Word, FontAgent Pro, plus my knowledge of Macs, FTP and pre-press goes beyond the basic level. I am a highly creative individual with the ability to handle multiple projects from start to finish. I possess excellent visual, verbal and written skills with attention to detail. I am excellent in prioritizing and exceeding deadlines with knowledge of publication spec requirements and design terms. I have magazine and catalog design experience as well as multiple promotional/marketing material and advertisement experience, along with archiving and post-production.*

## THE RABURN ADVANTAGE

**Protect Your Valuables**  
The enhanced design features double walled dividers that separate and protect fragile glasses and other odd-shaped items.

**Great Durability**  
An interlocking system places 12 integrated fasteners at each level of the rack, providing greater strength and durability.

**Rounded Handles and Rounded Corners**  
The design guarantees a sure, easy grip for your ease of movement. The rounded corners also are designed to easily pass through conveyor machines without hanging up on rinse paddles.

**More Solutions**  
25-compartment cup models add more solutions to the largest selection of racks in the industry. You can wash more cups at one time, saving you on water and energy costs.

**Convenient Handling**  
The rounded dividers provide a finger-friendly way for easier access and a surer grip, helping reduce breakage. The four-way index allows conveyor pick up from all sides, saving time and labor.

**Breakage Protection**  
A key feature in Raburn racks is the shock-resistant construction. Compartments protect the full height of individual contents while still allowing water to flow from all sides. Raburn racks feature double-side wall construction ensuring less breakage of wares and extending the life of the racks.
